SUMMARY

B.Tech Electronics & Telecommunication Engineering graduate (2025) with hands-on experience in building web applications and REST APIs using JavaScript and basic Python. Proficient in React.js, Express.js, and FastAPI with foundational knowledge of SQL and Excel for data handling and validation. Skilled at developing clean, reliable features and collaborating in fast-paced team environments while maintaining strong attention to detail and problem-solving ability.

SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, SQL, Power BI, Excel
- **Libraries & Utilities:** React, Tailwind CSS, Next.js, Git, Figma
- **Soft Skills:** User Empathy, Design-Thinking, Problem-Solving, Adaptability

PROJECTS

HireLite | Live | React.js, JavaScript, TailwindCSS, Gemini AI December 2025

- Developed a job discovery web platform that helps users explore job opportunities and connect with hiring companies through a clean and intuitive interface.
- Built a responsive frontend using React.js and TailwindCSS, implementing dynamic job listings, filtering functionality, and company profile pages for easy navigation.
- Designed a streamlined Quick Apply workflow enabling users to efficiently browse openings and connect with employers.
- Utilized AI-assisted development tools (e.g., ChatGPT, Claude) to accelerate UI component generation, debugging, and code optimization during the development process.
- Optimized UI/UX with reusable components and responsive layouts to ensure seamless performance across desktop and mobile devices.

SmartCampus Navigator| GitHub February 2026

- Built an interactive campus guide with map-based navigation, dynamic markers, and building/floor-level details for 40+ locations.
- Added a chat assistant that interprets queries like “Where is DBMS Lab?” using fuzzy search over names, aliases, and tags.
- Developed a scalable JSON-based location model (coordinates, descriptions, navigation hints).
- Designed a modern responsive UI with dark mode, quick-access shortcuts, and localStorage-based favorites.

TRAINING

Land Cover Classification – Maharashtra Remote Sensing Application Centre Jan 2025– May 2025

- Collaborated on development of a land cover classification system using frontend and backend technologies..
- Designed and implemented REST APIs to interface with machine learning models for application integration..
- Worked with the team to integrate features and support delivery in a project environment.
- Tech: JavaScript, React.js, Express.js, Gemini

EDUCATION

St. Vincent Pallotti College of Engineering and Technology Nagpur,Maharashtra

Bachelor of Technology in Electronics & Telecommunication Engineering 2021 – 2025

St. John School & College Wardha,Maharashtra

HSC (12th) – MSBSHSE | Percentage: 77.5% March 2021
